SUMMARY

Backend engineer who keeps a production SaaS correct and fast, and builds the systems that run on top of it. At PT Innovasia I grew from maintenance engineer to Lead of Technology in six months, and now lead engineering on a multi-tenant WhatsApp Business CRM. My strongest work sits where engineering meets money and reliability: usage-based billing, partner APIs, payment and webhook integrations, LLM features, and query performance on multi-million-row tables.

EXPERIENCE

Lead of Technology Jul 2025 - Present
PT Innovasia Inovasi Indonesia, Bandung (WhatsApp Business CRM SaaS)

- Lead day-to-day engineering on a multi-tenant **WhatsApp Business CRM** (Laravel monolith, Node.js broadcast service, Meta Graph API) serving **200+ organizations and 1.2M+ contacts**; review and merge the team's pull requests and handle releases.
- Built message billing end to end: a prepaid **quota engine** that prices each send by Meta category and deducts credit idempotently from status webhooks, then **postpaid monthly billing** validated against 737,317 production messages (1 without a price).
- Cut a broadcast-service cleanup query from **11.4 s to 4 ms** per run by bounding it to an index range (it had scanned 5.5M rows every minute), which let sending concurrency rise from 10 to 25.
- Built a customer analytics module with nightly roll-ups for 250 tenants: the heaviest view went from **2.6 s to 75 ms** and a conversion query from 39 s to 1.8 s.
- Extended the **partner REST API** used by zakat and wakaf organizations: API keys with IP allow-lists, idempotent writes, outbound webhooks, and one-call tenant provisioning.
- Rebuilt the **WhatsApp Flows webhook bridge** with per-endpoint signing secrets and multi-receiver routing, removed N+1 queries on the hot path, and added self-service recovery for encryption-key drift.
- Shipped **LLM features** on rate-limited, quota-billed queue workers: AI sales-funnel labeling with automated follow-ups, and Meta's Business AI agent with handover between AI, automations and human agents.
- Own production reliability: **Datadog APM and SLOs**, incident response (webhook storms, PHP-FPM saturation, OPcache exhaustion), and structured JSON logging.

Software Engineer, Support and Maintenance Jan 2025 - Jun 2025
PT Innovasia Inovasi Indonesia, Bandung

- Resolved **30+ critical production bugs** across broadcast, chat, transactions and catalog: race conditions, broken pagination, 24-hour session logic, and 403/500 errors.
- Optimized slow queries on million-row tables for chat lists, analytics charts and catalog pages.
- Built broadcast segmentation (demographic, database, transaction, tag) and archiving.

IT Support Staff Oct 2024 - Dec 2024
PT Tulus Asih Group, Cirebon

- Set up networking, hardware and software for a new branch office.

Big Data Analyst (MSIB internship) Feb 2022 - Jul 2022
PT BISA Artifisial Indonesia, Bandung

- Project manager for a speech-recognition modeling project at the PT Central AI subsidiary; taught Python data-visualization webinars.

SELECTED PROJECTS

- **innovasia.id** (Laravel, live since Jul 2026): rebuilt the company site off WordPress with a custom CMS and Notion lead capture; kept all 64 article URLs and mapped 88 legacy URLs with 301/410 rules.
- **WhatsApp Insight** (Laravel 12, 2026): standalone app that classifies customer conversations by sentiment, emotion and topic with an LLM, reusing earlier results so history is only billed once.

SKILLS

Backend	PHP 8, Laravel, MySQL (indexing, query tuning), Node.js, Redis, queues and schedulers, REST APIs
Integrations	WhatsApp Cloud API, Meta Graph API (templates, Flows, catalog), payment gateways (VA, QRIS), HMAC-signed webhooks, OpenAI API
Operations	Datadog (APM, logs, SLOs), Nginx, PHP-FPM, Cloudflare, Linux, Git
Frontend	JavaScript, Blade, HTML, CSS, design systems
Data	Python, data visualization

EDUCATION

Bachelor of Engineering, Computer Engineering
Telkom University, 2022 - 2024, GPA 3.43/4.00

Diploma (D3), Computer Engineering
Telkom University, 2019 - 2022, GPA 3.75/4.00

CERTIFICATIONS AND LANGUAGES

Cisco: CCNAv7 ITN (2020) and SRWE (2021), Data Analytics Essentials and Introduction to Cybersecurity (2024)

Indonesian (native), English (working proficiency, EPrT 527)
