SUMMARY

Backend engineer and tech lead with nearly two years on a production multi-tenant SaaS, promoted from maintenance engineer to Lead of Technology within six months. I lead a team of 3 developers on a WhatsApp Business CRM used by 200+ organizations. My strongest work sits where engineering meets money and reliability: usage-based billing, partner APIs, payment and webhook integrations, LLM features, and query performance on multi-million-row tables.

EXPERIENCE

Lead of Technology Jul 2025 - Present
PT Innovasia Inovasi Indonesia, Bandung (WhatsApp Business CRM SaaS)

- Promoted from maintenance engineer to Lead of Technology within 6 months; lead a **team of 3 developers** on a multi-tenant WhatsApp Business CRM used by **200+ organizations and 1.2M+ contacts**, reviewing and merging the team's pull requests and running releases.
- Launched **usage-based message billing** (live since Oct 2026) that covered **737,316 of 737,317** billable production messages in pre-launch validation, by building a prepaid quota engine and postpaid monthly invoicing driven by Meta status webhooks.
- Raised broadcast sending concurrency from **10 to 25** by cutting a cleanup query that scanned 5.5M rows every minute from **11.4 s to 4 ms**.
- Cut the heaviest analytics view from **2.6 s to 75 ms** and a conversion query from 39 s to 1.8 s by moving them to nightly roll-ups that process 250 tenants in 7 minutes.
- Cut two team-monitoring dashboards from **4.7 s to 0.45 s** and from 15 s to 3.4 s by replacing per-account queries with single scans.
- Extended the **partner REST API** that now carries **377,000+ transactions from 24 partner organizations** (zakat, wakaf and donation platforms), adding API keys with IP allow-lists, idempotent writes and outbound webhooks.
- Identified the most accurate model per cost for **AI sales-funnel labeling** (29 of 30 real conversations correct, versus 25 for the current model) by benchmarking 6 LLMs, and shipped the feature on rate-limited, quota-billed queue workers.
- Kept **4 production services above their 95 to 97% availability targets** (99.26% overall over 30 days, incidents restored in 20 to 40 minutes) with Datadog APM, SLOs and a public status page.

Software Engineer, Support and Maintenance Jan 2025 - Jun 2025
PT Innovasia Inovasi Indonesia, Bandung

- Fixed **30+ critical production bugs** (race conditions, broken pagination, 24-hour session logic, 403/500 errors) across broadcast, chat, transactions and catalog, which led to promotion after 6 months.
- Built broadcast segmentation (demographic, database, transaction, tag) and tuned slow queries on million-row tables for chat lists, analytics and catalog pages.

Earlier experience

- **IT Support Staff (contract)**, PT Tulus Asih Group, Cirebon, Oct 2024 - Dec 2024: set up network, hardware and software for a new branch office.
- **Big Data Analyst (MSIB internship)**, PT BISA Artifisial Indonesia, Feb 2022 - Jul 2022: project manager for a speech-recognition modeling project.

SELECTED PROJECTS

- **innovasia.id** (Laravel, live since Jul 2026): rebuilt the company site off WordPress with a custom CMS and Notion lead capture; kept all 64 article URLs and mapped 88 legacy URLs with 301/410 rules.
- **WhatsApp Insight** (Laravel 12, 2026): standalone app that classifies customer conversations by sentiment, emotion and topic with an LLM; a 3,243-message analysis costs about US$0.21 because earlier results are reused instead of billed again.

SKILLS

Backend	PHP 8, Laravel, MySQL (indexing, query tuning), Node.js, Redis, queues and schedulers, REST APIs
Integrations	WhatsApp Cloud API, Meta Graph API (templates, Flows, catalog), payment gateways (VA, QRIS), HMAC-signed webhooks, OpenAI API
Operations	Datadog (APM, logs, SLOs), Nginx, PHP-FPM, Cloudflare, Linux, Git
Frontend	JavaScript, Blade, HTML, CSS, design systems
Data	Python, data visualization

EDUCATION

Bachelor of Engineering, Computer Engineering
Telkom University, 2022 - 2024, GPA 3.43/4.00

Diploma (D3), Computer Engineering
Telkom University, 2019 - 2022, GPA 3.75/4.00

CERTIFICATIONS AND LANGUAGES

Cisco: CCNAv7 ITN (2020) and SRWE (2021), Data Analytics Essentials and Introduction to Cybersecurity (2024)

Indonesian (native), English (working proficiency, EPrT 527)
